Let's agree, it couldn't be at a better location

Producing for the world

India is the top global producer of meat, milk, castor seeds, sesame, mango, banana, chickpeas and is among the top producers globally for rice, wheat, sugarcane, tea, spices, onion, potatoes, & many others. With the new agri-export policy, the Indian F&B export is expected to grow from USD 32 billion to USD 70 billion by 2020.

A magnificent industry

The Indian food processing sector is currently valued at USD 258 billion and constitutes 14% of GDP through manufacturing. Food processing accounts for 32% of the country's total value of food & beverage industry. The Indian food retail market is the 6th largest grocery market in the world, expected to reach USD 895 billion by 2020.

An Investor's Paradise

India has an array of strong emerging brands in the F&B sector which leads to lucrative investment opportunities. Due to the growing need to feed the masses and increased opportunity to export to FTA partner countries, India has established itself as a sought after investment destination with investors seeing growth of capital and increased profitability.
